I've been passionate about development since my teenage years, constantly having to learn new skills and rework the way that I solve problems excites me.

Education

Ohio University - Bachelor in Computer Science August 2022 - May 2026

- Successfully led my team during our senior capstone project, navigating them through difficult features and helping them problem-solve.
- Completed my curriculum as one of the top 10% of students selected for the deans list.

MVCTC - High School Diploma August 2020 - May 2022

- Attended the Business Professionals of America C++ National Championship two years in a row ranking 10 out of 4,000.
- Selected to be student ambassador for the school's development program during my Senior year.

Skills

Languages: Assembly, OCaml, JavaScript, TypeScript, CSS, HTML, SQL, C++, Python

Technologies: Git, Linux, Docker, React, Vue, Next.js, Django, PostgreSQL, Bash, Fast API, Swift, AWS (EC2, S3, IAM).

Experience

Software Engineer, Awards Pulse - Park City, Utah Aug 2025 - June 2026

- Contributed to the continuous evolution of a multi-platform SaaS solution using modern technologies: React (frontend), Django/PostgreSQL (backend), and Swift (Mobile)
- Redesigned and optimized the secure login and sign up features on the web application with enhanced password policies and standardized validation.
- Developed and deployed a secure MCP server using the optimized OAuth system improving quality of work and connectivity to LLMs within the system.

Projects

Awards Pulse [🔗](#) Vue, Django, Docker

- Created a full-stack AI powered award matching system for companies utilizing React, Django, Postgres and Dify.
- Deployed the project using docker on an AWS EC2 server ensuring proper IAM user scope and secure S3 configurations.

Compify [🔗](#) React, Django, Docker

- Developed a SaaS for connecting agents to applications utilizing managed OAuth and unique API integration.
- Built a declarative connector platform integrating 200+ third-party applications, exposing 740+ MCP tools across vendor APIs for AI-agent control.

Cobalt Tech Solutions [🔗](#) Devops, Project Management

- Started a software development agency to help business owners leverage AI and Software to make their complex problems simple.
- Developed over 20 projects over a wide array of different business types, requiring rigorous new problem-solving skills and a constant need to adapt to changing environments.

Health Punk [🔗](#) Swift, Fast API

- Developed a gut and digestion tracking app for a clinic to help them achieve long-term dietary success with their clients.
- Navigated the submission process and development requirements of the Apple Store.
- Utilized modern frameworks such as Swift as an engaging demonstration of how to create IOS applications.

Additional Work Experience

Field Technician, Tech Force On Site May 2022- August 2025

- Worked in VA Hospitals around the nation to develop and update their communication systems.
- Navigated complex phone auditing systems to track and maintain consistent deployment throughout facilities with over 50,000 phones.

Interests

Distance Road Biking, Guitar and Hiking.
